COMPANY INTRODUCTION

企業簡介

The new favorite in the personalized consumption era!

BOUTIQUE HOTEL -

We should figure out this concept before we understand Boutique hotel furniture. The fast developing international chain hotel industry has made standardization popular all over the world since the beginning of the 1960s. The Hilton or Sheraton logo, and familiar brands can be seen, which increase people's travel security sense! However, as people's travel needs are subdivided, standardization gradually loses their attraction. Especially from the end of the last century and the beginning of this century, a large number of young city upstarts have high hopes for travel, they are tired of the template of the lobby and rooms as well as the same hue of space design. They don't like the service personnel in the same uniform waiting for their arrival in the other side of the earth. The new traveller generation's pursuit of travel life has gone beyond their parents' attention to security the sense and freshness becomes more attractive. They are longing for a spate of surprise in their travel. Even when living in hotels, they want to find endless fun. Any minor changes in the market can not escape the hotel operators's keen sense. They invited the world's top designers to create wonderful and unique hotels one by one. And give them a nice name - Boutique Hotel. These rooms, complicated or simple, are enough for the fashion-oriented people.
